Internet Terminal Desk Unit

The Internet Terminal Desk unit allows Internet access to be offered safely in environments where there is little or no supervision. The desk unit is flexible enough to work with any existing fixtures and fittings with regards to desks/furniture or indeed utilise the one provided.

The steel enclosure houses the main PC unit itself and a coin acceptor mechanism. The coin mechanism can be programmed to accept a variety of coins and currencies including Euro.

The main unit enclosure is of the following dimensions: 720H x 200W x 590D mm.

The Internet Terminal Desk consists of the following items, as illustrated above:

- a. Black Steel enclosure (powder coated with security lock).
- b. Coin acceptor
- c. Coin catcher box
- d. Work top surface
- e. Table leg
- f. Internet Terminal unit (PC) fully configured to use. Complete with 17" LCD monitor, keyboard & mouse.
